

LEATHERMAN®

Now you're ready.®

MUT™

THE FIRST MULTI-TOOL FOR THE TACTICAL AND THE PRACTICAL

Developed by the world's leading multi-tool company in conjunction with competitive shooters and operational snipers, the Leatherman MUT is the first multi-tool that functions as both a tactical and practical tool for soldier, LE, or civilian shooter. Working on an M16 or MRAP; going to the range, or out to the hunting cabin. The Leatherman MUT takes tactical design and modularity to the next level while maintaining practical multi-tool functions for everyday life.

In addition to its standard functions, the Leatherman MUT was designed for the following maintenance on the components of the M16/AR15 family of rifles:

- > **Optic mounting and adjustment**
- > **Bolt override malfunctions**
- > **Take down and retaining pin removal**
- > **Firing pin retaining pin removal**
- > **Carbon removal on bolt carrier, bolt and firing pin**
- > **Cleaning rod and brush attachments/use**

MUT™ UTILITY

SPECS

Needlenose Pliers
Regular Pliers
154CM Replaceable Wire Cutters
154CM Replaceable Hard-wire Cutters
Stranded Wire Cutters
420HC Combo Knife
Saw
Hammer
Replaceable Cutting Hook
Bolt Override Tool
Replaceable Firearm Disassembly Punch
Replaceable Bronze Carbon Scraper
Cleaning Rod/Brush Adapter
Carabiner/Bottle Opener
Bit Driver
Removable Pocket Clip
1/2" and 3/8" Wrench Accessory
MOLLE Sheath
Weight: 11.2 oz | 317.5 g
Closed Length: 5 in | 12.7 cm
Blade Length: 3 in | 7.62 cm

INCLUDED BITS

Phillips #1-2 and 3/16" Screwdriver
Phillips #2 and 1/4" Screwdriver
Torx #15 and Hex 7/64"

NEVER TELL THE PLATOON SERGEANT YOU HAVE NOTHING TO DO

1. Regular/Needlenose Pliers

The centerpiece of any Leatherman, the MUT jaws are the strongest we've ever made. The 420 stainless steel pliers are heat-treated for strength and ground for precision. Both sides of the jaws are threaded for cleaning rod and brush attachments, making them accessible when the tool is open or in the folded/closed position. The EOD version of the MUT features a cap crimper in place of the regular pliers.

2. Replaceable Regular and Hard-wire Cutters

The Leatherman regular and hard-wire (fuse-wire on the EOD model) cutters are made from 154CM stainless steel so they hold an edge three-times as long as traditional stainless steel. And because they're replaceable, a quick turn with a Torx #8 means they can be removed for resharpening in the field, or replaced altogether.

1

3. Replaceable Carbon Scraper

The primary enemy to an M16/AR15 is the carbon deposited from the direct impingement gas system. Over time carbon build-up can harden and degrade the performance of a weapon system. To effectively remove carbon it's necessary to scrape all areas of the bolt, bolt carrier and firing pin. The replaceable carbon scraper is designed with enough surface area to reach and quickly clean all areas of the bolt carrier group. In addition, it's made of bronze to prevent scars from scraping.

2

4. Replaceable Firearm Disassembly Punch

There's always a need for a punch in weapons maintenance. From pushing takeout pins to removing detaining pins, the 1/8" punch can handle it all. The stainless steel punch is removable for use alone or with the hammer-end of the MUT. The threads are also designed for adapting cleaning rods and brushes, increasing your leverage and reach for a more thorough cleaning. The EOD model features a C4 punch in place of the firearm disassembly punch.

5. Replaceable Cutting Hook

Safety or cord cutters are necessary for number of day-to-day operations for all uniformed services. The cord cutters have been designed to offer great leverage for cutting zip ties, cord, or clothing. For safety, when the tool is in the closed position, a bit in the driver blocks access to over-sized cutter opening. The bit can also be left out for those who require more frequent access to this feature.

6. Bolt Override Tool

The bolt override is the most difficult malfunction to clear; often times in the most life-threatening situations. With this tool, the malfunction can be cleared quickly and without disassembly. Simply remove the magazine, insert the bolt override tool onto the bolt carrier and pull sharply to the rear.

WHEN IT COMES TO PLANS, TWO IS ONE AND ONE IS NONE

Modularity

The most commonly used parts on the Leatherman MUT are replaceable and all use a Torx #8 for removal and reattachment. Being able to replace these parts in-the-field, keeps down-time to a minimum. In addition there are multiple areas on the tool threaded for cleaning rods and brushes. A removable pocket clip, carabiner, or MOLLE sheath are all options for carrying your MUT. When not in use for carrying the tool, the carabiner doubles as a bottle opener.

Extras

The MUT comes with a wrench accessory that features 1/2" and 3/8" 12-point heads for adjustment to optics systems. Built to military performance specifications, the ballistic nylon MOLLE sheath features extra wrench and bit kit accessory pockets. When not in use the sheath can hold a double-stack 9mm magazine.

Superiority

Materials and treatment for each feature in the MUT were chosen for their specific task. Bronze alloy is used on the carbon scraper to protect parts from scarring. 154CM is used in the wire cutters to keep their edge longer. The knife blade is heat treated for the optimum combination of rigidity and edge retention, while the handles were treated for more flexibility when twisting. Down to the smallest features...Everything was factored in.

Warranty

The quality and engineering precision built into every Leatherman multi-tool is backed by a 25-year warranty. For more information visit www.leatherman.com.

Ordering Information

Please contact your Leatherman Sales Representative, or Leatherman Customer Service (800-847-8665) for pricing and ordering information.
